

Call for Abstracts

Bubble-tea Session of Open Problems at ISAAC 2018

The 29th International Symposium on Algorithms and Computation

December 16–19, 2018, Jiaoxi, Yilan County, Taiwan

<http://isaac2018.ie.nthu.edu.tw/>

Open Problems: Then and Now

In the history of mathematics and computer science, tackling unsolved problems has been a driving force for many new developments. Very often, open problems gain attention and interest not just because of their practical importance, but because they have withstood the test of time and remained unsolved for many years, turning them into visible challenges of wit.

In this session, we will combine a review of various classic open problems from our fields with the presentation of new challenges. If you want to contribute such a problem, please send an email to isaac2018.tw@gmail.com as follows:

- Subject: [Open Problems ISAAC 2018] your problem name

- Body:

What is your name?

What is the problem's name?

What is the problem?

How old is it?

Has it been posted/published? (Where?)

What reward would you offer to solve it?

Will you be at ISAAC to present your problem?

Submissions are open until **Nov. 16, 2018**. (Anywhere on Earth)

Please be ready to present your problem on at most two slides if it gets accepted.

Committee

Ho-Lin Chen (National Taiwan University, Taiwan)

Kai-Min Chung (Academia Sinica, Taiwan)

Sándor Fekete (TU Braunschweig, Germany, Co-Chair)

Wing-Kai Hon (National Tsing Hua University, Taiwan)

Luca Trevisan (UC Berkeley, USA, Co-Chair)
